

TENNESSEE
WINGS OF LIBERTY
MUSEUM

April
11
2025

CURRENT WORK

- Water and sewer lines are being installed into the building
- Metal panels (curtain wall) are being installed at the main entrance
- Interior drywall painting is being completed
- Overhead (drywall) paint in the lobby has begun
- Atrium footings are being dug and poured

The mast arms for the traffic signals at the intersection of Tiny Town Rd. and Fort Campbell Blvd. have been delivered.

JOBSITE RECAP

- 1) Sock ducts are being hung in the main exhibit hall
- 2) Equipment in the data room is installed in preparation for bringing the low voltage/data lines from Ft. Campbell into the building
- 3) Oversized footings for the atrium are being utilized to remove the need for interior columns. No interior columns will lead to a more user-friendly event space.
- 4) Overhead dry-fall painting is in progress in the lobby
